& College of Radiology

Consult YOUR DOCTOR
AND CONSIDER
A MAMMOGRAM IF YOU ARE

A lady above 40 years of age

If you have an immediate family history
of breast cancer

If you have the following breast changes

- breast lumps, recent nipple retraction, skin dimpling
- unusual pain in the same spot of the breast
- thickening or hardening of an area of the breast

*a mammogram may detect
breast cancer even before you can feel it*

A MAMMOGRAM
